KRISTIAN NOVAN

COMPUTER SCIENCE STUDENT | INTELLIGENT SYSTEMS (AI) & UI/UX ENTHUSIAST

kristiannovan17@gmail.com | +62 895-7024-96980 | linkedin.com/in/kristian-n-195031328 | GPA: 3.5875 / 4.00 | github.com/krisvan123

ABOUT ME

Computer Science undergraduate at BINUS University (Semesters 1–3 Semarang Main Campus; Semesters 4–5 Jakarta Streaming in Intelligent Systems / AI), combining rigorous machine learning engineering with human-centered UI/UX design. Experienced in developing regression pipelines, natural language processing models, computer vision classifiers, and heuristic routing optimization. Active as HIMTI Mentor Staff and event Master of Ceremony, integrating technical analytical discipline with cross-functional leadership, public speaking, and community volunteering. Passionate about engineering dependable, user-centric AI solutions in dynamic product and engineering environments.

EDUCATION

BINUS University – Semarang & Jakarta, Indonesia 2024 – Present

Bachelor of Computer Science | Cohort B2028 Expected Grad: 2028

- **Academic Track:** Semesters 1–3 at BINUS Semarang (Main Campus); Semesters 4–5 Mobility Streaming in Intelligent Systems (AI) at BINUS Jakarta.
- **Cumulative GPA:** 3.5875 / 4.00 (Semester 1: 3.37 · Semester 2: 3.52 · Semester 3: 3.68 · Semester 4: 3.78).
- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Natural Language Processing, Computer Vision, Deep Learning, Algorithm Design & Analysis, Human-Computer Interaction, UI/UX Design, Software Engineering, Database Systems.

EXPERIENCE

Himpunan Mahasiswa Teknik Informatika (HIMTI) BINUS University Semarang, Indonesia

Staff of Mentor Division Feb 2025 – Present

- Mentored junior Computer Science students in algorithmic problem solving, core data structures, and committee leadership pathways.
- Facilitated study clinics and peer review sessions for School of Computer Science (SOCS) coursework, supporting academic progression.

PTK Techno Committee & Academic Events Semarang, Indonesia

Master of Ceremony (MC) & Stage Host Jun 2024 – Present

- Hosted live academic seminars, technology workshops, and formal stage programs, coordinating rundowns and speaker moderation.
- Engaged diverse audiences with clear articulation and composure, maintaining structured event timing and dynamic presentation flow.

DPD WALUBI Jawa Tengah – Waisak National Committee Magelang, Indonesia

Medical & Humanitarian Logistics Volunteer May 2025

- Managed distribution logistics for medical aid stations and patient triage support during the national social health service at Candi Borobudur.
- Collaborated closely with doctors, nurses, and operational personnel under high-volume field conditions catering to thousands of community beneficiaries.

PROJECTS

EcoRouter AI — Dynamic Load Routing Optimization | Top 41 Finalist at CompFest AIC (Universitas Indonesia)

- **Problem & Build:** Addressed sustainable green delivery challenges by modeling a vehicle routing problem with dynamic cargo mass depletion constraints. Developed heuristic search and transit weight algorithms in Python to calculate fuel efficiency across diverse delivery sequences.
- **Validation & Analysis:** Benchmarked optimization permutations against standard routes, achieving measurable transit mass savings and fuel burn reduction. Earned Top 41 National Finalist standing out of competitive multi-university engineering teams.

AirSense Dashboard | AOL Machine Learning Project

- **Problem & Build:** Addressed regional environmental data gaps by engineering a machine learning regression pipeline to estimate PM2.5 particulate concentrations using macro environmental indicators from World Health Organization (WHO) datasets.
- **Validation & Deploy:** Built feature correlation workflows and developed an intuitive dashboard interface enabling instant sensor-free particulate estimation and parameter exploration for environmental researchers.

NiVScan — Biomedical NLP Information Extraction | Natural Language Processing Project

- **Problem & Build:** Addressed research synthesis bottlenecks in infectious disease tracking by developing a Natural Language Processing system to extract structured intelligence from unstructured scientific reports on Nipah virus transmissions.
- **Validation & Analysis:** Implemented text preprocessing pipelines, biomedical lexical filtering, and token extraction to automate clinical finding summaries, streamlining research reviews for epidemiology students and scholars.

Skinical — Hybrid Lesion Classifier & Web Interface | Computer Vision & Deep Learning Project

- **Problem & Build:** Addressed non-invasive dermatological screening needs by engineering a comparative computer vision pipeline evaluating classical image descriptors alongside deep convolutional representations for skin lesion triage.
- **Validation & Deploy:** Deployed a lightweight, responsive web application interface providing instant diagnostic confidence scores, structured result visualization, and lesion feature analysis.

Travel Itinerary Planner | Human-Computer Interaction & UI/UX Prototype

- **Problem & Build:** Addressed cognitive overload in multi-destination trip coordination by conceptualizing a high-fidelity mobile application in Figma, structured around progressive disclosure and intuitive visual hierarchy.
- **Implementation & Optimization:** Developed an end-to-end design system with reusable typography, button states, and micro-interactions, validating user workflows through cognitive walkthroughs and usability heuristic evaluations.

FinPro — Personal Financial Management Platform | Full-Stack Software Engineering Project

- **Problem & Build:** Addressed budget transparency needs for students and young professionals by developing a modular personal financial tracking system emphasizing clean architectural patterns and responsive web views.
- **Validation & Deploy:** Engineered database schemas and responsive transaction logging workflows with data validation to support accurate day-to-day income and expense analytics.

AREA OF EXPERTISE

- **Technical & AI Engineering:** Python, PyTorch, Scikit-Learn, Machine Learning (Regression, Classification), Computer Vision (OpenCV), Natural Language Processing (NLP), Heuristic Optimization, Data Preprocessing.
- **Web & Software Development:** Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML5/CSS3, Git & GitHub, RESTful API Integration, Component Architecture.
- **UI/UX Design & Prototyping:** Figma (Design Systems, Wireframing, High-Fidelity Prototyping, Interactive Components), Human-Computer Interaction (HCI) Principles, Usability Evaluation.
- **Leadership & Interpersonal Skills:** Public Speaking (Master of Ceremony), Academic Mentorship, Theater Arts & Choir Ensemble, Cross-Functional Team Coordination, English & Indonesian.

CREDENTIALS & ACHIEVEMENTS

- **Peer-Reviewed Research Publication:** ICORIS 2026 Paper Author (IEEE Indonesia Section & UTB).
- **National AI Competition Finalist:** CompFest AIC 2026 Top 41 Finalist (Universitas Indonesia).
- **Cloud AI Credential:** Microsoft Certified: Azure AI Fundamentals (Microsoft & GreatNusa).
- **Social Service Recognition:** Humanitarian Volunteer Service Certificate (DPD WALUBI Jawa Tengah, Waisak 2025).
