KRISTIAN NOVAN

COMPUTER SCIENCE STUDENT | INTELLIGENT SYSTEMS (AI)

kristiannovan17@gmail.com | +62 895-7024-96980 | linkedin.com/in/kristian-n-195031328 | kristiannovan.vercel.app | github.com/krisvan123 | GPA: 3.59 / 4.00

ABOUT ME

Computer Science undergraduate at BINUS University (Semesters 1–3 Semarang; Semesters 4–5 Mobility Streaming in Intelligent Systems / AI, Jakarta). Driven by deep curiosity to explore computational algorithms, machine learning pipelines, and intelligent systems from the ground up. Enthusiastic about collaborative problem solving, organizational leadership, and professional stage moderation as a Master of Ceremony. Combines analytical technical discipline with clear, articulate interpersonal communication across multidisciplinary teams.

EDUCATION

BINUS University – Semarang & Jakarta, Indonesia 2024 – Present

Bachelor of Computer Science | Cohort B2028 Expected Grad: 2028

- **Academic Track:** Semesters 1–3 at BINUS Semarang (Main Campus); Semesters 4–5 Mobility Streaming in Intelligent Systems (AI) at BINUS Jakarta.
- **Cumulative GPA:** 3.59 / 4.00 (Semester 1: 3.37 · Semester 2: 3.52 · Semester 3: 3.68 · Semester 4: 3.78).
- **Relevant Coursework:** Machine Learning, Artificial Intelligence, Natural Language Processing, Computer Vision, Deep Learning, Algorithm Design & Analysis, Human-Computer Interaction, Software Engineering, Database Systems.

EXPERIENCE & LEADERSHIP

Himpunan Mahasiswa Teknik Informatika (HIMTI) BINUS University Semarang & Jakarta, Indonesia

Staff of PTK Division & Mentor Division Oct 2024 – Feb 2026

- **Mentor Staff (SESVENT 2025, Oct 2025):** Mentored new HIMTI members and activists, introducing organizational culture, workflow habits, and collaboration ethics.
- **Staff PTK & Games MC (TECHNO 2025, Sep 2025):** Coordinated recruitment onboarding and hosted live games sessions welcoming new students into the HIMTI organization.
- **Company Visit Committee (PT Pura Smart Technology, Jun 2025):** Managed logistics, participant agendas, and corporate liaison for industrial tech exploration.
- **Master of Ceremony (FEAST SOCS, Mar 2025):** Hosted the annual iftar gathering uniting all students across the School of Computer Science (SOCS).

Stage Moderation & Master of Ceremony (MC) Semarang & Jakarta, Indonesia

Master of Ceremony & Event Moderator Mar 2025 – Nov 2025

- Served as Master of Ceremony for signature university events, including FEAST SOCS (Mar 2025), TECHNO 2025 (Sep 2025), and BIFEST CBDC (Character Building Development Center, Nov 2025).
- Maintained structured event timing, speaker moderation, and audience engagement with composed, professional stage delivery.

DPD WALUBI Jawa Tengah – Waisak National Committee Magelang, Indonesia

Medical & Humanitarian Logistics Volunteer May 2025

- Managed distribution logistics for medical aid posts and patient triage support during the national social health service at Candi Borobudur and Mendut.
- Collaborated with medical teams under high-volume field conditions serving thousands of community beneficiaries.

PROJECTS

EcoRouter AI — Dynamic Load Routing Optimization | Top 41 Finalist at CompFest AIC (Universitas Indonesia)

- **Problem & Build:** Addressed sustainable green delivery challenges by modeling a vehicle routing problem with dynamic cargo mass depletion constraints. Developed heuristic search and transit weight algorithms in Python to calculate fuel efficiency across diverse delivery sequences.
- **Validation & Impact:** Benchmarked optimization permutations against standard routes, achieving measurable transit mass savings. Earned Top 41 National Finalist standing out of competitive multi-university engineering teams.

ProMod AI — Post-Translational Modification Screening | AOL Computational Biology Project

- **Problem & Build:** Addressed resource-heavy wet-lab identification by developing a machine learning sequence classification pipeline to screen protein phosphorylation sites (Serine, Threonine, Tyrosine) critical in cellular signaling.
- **Validation & Impact:** Engineered amino acid feature representations to recognize modification motifs, providing biomedical researchers with rapid computational pre-screening for oncological and neurological studies.

PlatGizi — Smart Nutritional Menu Planning System | Machine Learning Coursework Project

- **Problem & Build:** Addressed dietary planning friction by developing an algorithmic recommendation system that balances caloric targets, macronutrient distributions, and user preferences for healthy lifestyles.
- **Validation & Impact:** Implemented constraint-satisfaction and machine learning recommendation algorithms on nutrition datasets, generating balanced daily meal combinations with accessible dietary insights.

NiVScan — Biomedical NLP Information Extraction | Natural Language Processing Project

- **Problem & Build:** Addressed literature synthesis bottlenecks in epidemiology by developing an NLP pipeline to extract structured insights from unstructured public health reports on Nipah virus transmissions.
- **Validation & Impact:** Implemented token extraction, lexical parsing, and clinical summary generation, accelerating scientific literature review for health researchers and students.

Skinical — Hybrid Lesion Classifier & Web Interface | Computer Vision & Deep Learning Project

- **Problem & Build:** Addressed non-invasive dermatological triage by engineering a comparative computer vision pipeline evaluating classical feature descriptors alongside convolutional neural networks for skin lesion classification.
- **Validation & Impact:** Deployed a lightweight, responsive web application interface delivering instant diagnostic confidence scores, feature heatmaps, and lesion inspection workflows.

FinPro — Personal Financial Management Platform | Frontend Developer (Team Project)

- **Problem & Build:** Built the transaction-entry frontend with React, Next.js and TypeScript, including typed user input, form flow and accessible financial records.
- **Validation & Impact:** Integrated frontend forms with REST endpoints and tested data flow using dummy records on a separate Git branch. Backend APIs were developed by teammates.

WarungWise — Inventory, Expiry & Restock Management | Harvard CS50x Final Project

- **Problem & Build:** Individually developed a stock management web app for Indonesian warungs using Python, Flask, SQLite, Jinja, HTML and CSS.
- **Validation & Impact:** Implemented product and batch tracking, expiry and FEFO workflows, sales recording, restock guidance, reporting and CSV export.

AREA OF EXPERTISE

- **Technical & AI Engineering:** Python, PyTorch, Scikit-Learn, Machine Learning (Regression, Classification), Computer Vision (OpenCV), Natural Language Processing (NLP), Heuristic Optimization, Data Preprocessing.
- **Web & Software Development:** Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML5/CSS3, Git & GitHub, RESTful API Integration, Component Architecture.
- **UI/UX Design & Prototyping:** Figma (Design Systems, Wireframing, High-Fidelity Prototyping, Interactive Components), Human-Computer Interaction (HCI) Principles, Usability Heuristic Evaluation.
- **Leadership & Interpersonal Skills:** Public Speaking (Master of Ceremony), Academic Mentorship, Theater Arts & Choir Ensemble, Cross-Functional Team Coordination, English & Indonesian.

CREDENTIALS, PUBLICATIONS & ACHIEVEMENTS

- **Peer-Reviewed Research Publication (IEEE):** Author of *"Decoding Neural Representations: CAV-Based Activation Engineering for Explainable Brain Tumor Segmentation across Multiple Architectures"*, presented at The 8th International Conference on Cybernetics and Intelligent Systems (ICORIS 2026), IEEE Indonesia Section & UTB Bandung.
- **National AI Competition Finalist:** CompFest AIC 2026 Top 41 Finalist (Universitas Indonesia).
- **Cloud AI Credential:** Microsoft Certified: Azure AI Fundamentals (Microsoft & GreatNusa).
- **Social Service Recognition:** Humanitarian Volunteer Service Certificate (DPD WALUBI Jawa Tengah, Waisak 2025).
