KRISTIAN NOVAN

Computer Science Undergraduate | Intelligent Systems (AI) Specialization

Jakarta, Indonesia | Email: kristiannovan17@gmail.com | LinkedIn: linkedin.com/in/kristian-n-195031328 | GitHub: github.com/krisvan123

PROFESSIONAL SUMMARY & AVAILABILITY

Computer Science student at BINUS University (B2028), specializing in Intelligent Systems (AI) during Semesters 4-5. Passionate about connecting technical rigor in Machine Learning with human-centered UI/UX design. Open to internship and work opportunities in AI systems, full-stack software development, and UI/UX product engineering.

EDUCATION

BINUS University School of Computer Science (SOCS) — Jakarta, Indonesia
Bachelor of Computer Science (B2028) | Specialization: Intelligent Systems (AI), Semesters 4-5 — Expected Grad: 2028

TECHNICAL & INTERPERSONAL SKILLS

Languages & Frameworks: Python, Next.js, React, TypeScript, JavaScript, Tailwind CSS, HTML5/CSS3
AI & Machine Learning: Scikit-Learn, PyTorch, Computer Vision, Natural Language Processing (NLP), Regression, Heuristics
Design & Tools: Figma (UI/UX, Prototyping, Wireframing), Git, GitHub, VS Code, Cloud AI (Microsoft Azure)
Interpersonal & Creative: Master of Ceremony (Public Speaking), Mentorship, Team Leadership, Choir, Theater Arts

FEATURED ACADEMIC & COMPETITION PROJECTS

EcoRouter AI Dynamic Load Routing Optimization — Python, Heuristic Optimization, Green Logistics
- " Modeled vehicle routing optimization for CompFest AI Competition under dynamic parcel weight reduction constraints.
- " Calculated sequential transit mass savings to identify delivery sequences that minimize total fuel burn and carbon emissions.

AirSense Dashboard PM2.5 Environmental Predictor — Python, Machine Learning, Regression, WHO Datasets
- " Built regression prediction pipeline estimating PM2.5 particulate concentration from macro environmental indicators.
- " Provided sensor-free air quality assessment interface enabling regional parameter analysis based on historical WHO data.

Skinical Hybrid Lesion Classifier & Web Interface — Computer Vision, Deep Learning, Classical ML, Web UI
- " Comparative study evaluating classical feature descriptors vs. hybrid deep representations for skin lesion screening.
- " Designed lightweight web application interface for diagnostic result inspection and non-invasive screening support.

FinPro Personal Financial Management Platform — Software Engineering, Full-Stack Architecture, System Design, U
- " Engineered personal budget tracker emphasizing modular design patterns and intuitive day-to-day money management flows.

Travel Application HCI & Mobile Prototype — Figma, Human-Computer Interaction, UI/UX Design System
- " Applied cognitive load minimization and user flow principles to design a high-fidelity travel itinerary planner in Figma.

CREDENTIALS, LEADERSHIP & CAMPUS EXPERIENCE

" **ICORIS 2026 Paper Author:** IEEE Indonesia Section & UTB Peer-reviewed research publication presenter
" **CompFest AIC 2026 Top 41 Finalist:** Universitas Indonesia National AI Machine Learning Competition
" **Microsoft Azure AI Fundamentals:** Microsoft & GreatNusa Cloud AI, Computer Vision & NLP Credential
" **HIMTI Staff of Mentor Division:** HIMTI BINUS Guided junior students in committee leadership preparation
" **Techno Event Master of Ceremony (MC):** PTK Techno Committee Stage host, audience engagement, and logistics
" **WALUBI Volunteer Service (Waisak 2025):** DPD WALUBI Jateng Medical logistics and humanitarian service at Candi Borobudur
