PROFILE

Computer Science undergraduate at BINUS University, specializing in Intelligent Systems. Focused on frontend development with React, Next.js, and TypeScript; experienced in building user interfaces, handling forms, integrating REST APIs, and collaborating through Git workflows. Also interested in applied AI and human-centered design.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, HTML, CSS, Tailwind CSS, Bootstrap
Tools & Collaboration: Git, GitHub, REST API integration, frontend state management, UI testing
Additional Experience: Python, Flask, SQLite, PostgreSQL concepts, machine learning fundamentals

SELECTED PROJECTS

FinPro - Personal Finance Web Application

Frontend Developer | Team Project

React / Next.js / TypeScript / REST APIs

Built transaction-focused frontend interfaces and form input flows. Coordinated with backend teammates to validate API data flow and tested integration using dummy data on a separate Git branch. Frontend responsibility only; backend APIs were owned by teammates.

WarungWise - Inventory & Expiry Management

Individual Project | Harvard CS50x

Python / Flask / SQLite / Jinja / HTML / CSS / JavaScript

Created a local-first web app for small Indonesian shops with product and batch tracking, expiry alerts, FEFO sales handling, rule-based restock suggestions, reporting, and CSV export. Developed and tested the interface and application workflows.

EDUCATION

BINUS University - B.Sc. Computer Science

Intelligent Systems concentration | Cohort 2028 | Cumulative GPA: 3.59 / 4.00

ADDITIONAL ACTIVITIES

HIMTI BINUS - organization and mentoring activities; Master of Ceremony for campus events; community volunteering.
